SUMMARY

AI Automation and Systems Engineer with hands-on experience designing, building and deploying AI-powered agents and intelligent automation solutions across business operations. I work with large language models and agentic frameworks to automate complex workflows, integrate enterprise systems, and solve real operational problems. I bring a practical software engineering mindset, a genuine curiosity for emerging AI technology, and a passion for building solutions that create meaningful impact.

WORK EXPERIENCE

AI Automation & Systems Analyst

May 2025 – Present

AXTON Finance (Melbourne, VIC)

- Scaled AXTON's automation infrastructure from 16 to 30+ active workflows, building and deploying solutions across Zapier, Make, n8n, and Microsoft Power Automate to eliminate manual and repetitive tasks for brokers and administration staff.
- Integrated and connected 25+ business platforms and software tools, designing workflows that combine enterprise knowledge and tooling to create a unified and reliable technology ecosystem across the business.
- Developed and deployed AI-powered agents using OpenAI and Claude APIs, iterating on prompts, tool definitions and architectures to improve reliability and accuracy, saving approximately 50 hours of manual processing per month.
- Wrote custom scripts and code including Python and JavaScript to build bespoke system connectors enabling complex multi-system workflows beyond standard platform capabilities.
- Managed cloud infrastructure via Microsoft Azure including hosting of internal web applications and cloud-based automation workflows.
- Built data analysis reports and dashboards providing leadership with actionable operational insights to support business decision-making.
- Leading the technical integration of Effi CRM into AXTON's operations to streamline lead nurturing and client management workflows, translating business requirements into a scalable solution to improve broker efficiency and data consistency across the business.
- Designed, built and deployed a production MCP (Model Context Protocol) server exposing 11 custom tools that connect Claude to the Mercury Nexus CRM via the Connective API, giving 10 staff conversational access to live deal and client data. Owned the system end to end from architecture through deployment to ongoing support.
- Documented AXTON's full technology stack, mapping every platform, integration and data flow across the business, giving leadership a single reference for how systems connect and where dependencies sit.

Operations Team Member

Oct 2023 – Present

JB Hi-Fi (Melbourne, Vic)

- Concurrent casual role. Inventory control, order fulfilment and customer issue resolution.

EDUCATION

Swinburne University of Technology

Hawthorn, VIC - December 2024

Bachelor of Computer Science, Majoring in Data Science

SKILLS

Programming: Python, JavaScript, C#, React.js

Automation & Integration: Zapier, Make, n8n, Microsoft Power Automate

AI & Agentic Development: OpenAI API, Claude API, AI Agent Builds, Prompt Engineering, Model Context Protocol (MCP), Agentic Frameworks, GenAI Prototyping, API Integration

Cloud: Microsoft Azure, AWS

Development Tools: Git, Visual Studio Code
